

*In human creativity thought
is the impeller of each step,
both in small and in great.
The significance of thought is most powerful!
AY, Infinity II, 348*

ARTISTS OF THOUGHT
LET'S BUILD IN BEAUTY THE CIVILIZATION OF LIGHT
From Aries to Pisces – the planetary evolution in the year 2018-19

Tuesday, March 20, at 5:17pm CET, the Sun will be at the equinox at 0 degrees of the ecliptic in the Sign of Aries, thus giving rise to the new astrological year that will end with the sign of Pisces, after having travelled month after month through the 12 astrological signs.

The path of the Sun represents the symbolic journey of the Soul of every human being who, in accordance with the Divine Plan, incarnates in Aries and gradually experiences the Life on this planet, and then returns to the Father's House in Pisces.

With the year 2018 begins a period of 7 years of preparation towards 2025, a significant one for several reasons:

1. planetary and star alignments of epochal importance (the dates refer to the heliocentric vision): (i) Sirio conjuncts Jupiter (3.11.25); (ii) Saturn joins Neptune at 0 ° Aries (11.12.25); (iii) Alcione conjunct with Uranus and Earth (22.11.25).

2. Centennial Grand General Gathering of the Hierarchy.

3. The entry into manifestation of the 4th Ray of Harmony through conflict.

These events will be an important step in the passage we are experiencing and witnessing while leaving the Piscean Era to enter Aquarius, the Age of Brotherhood, Knowledge, Group Consciousness, leading us to the new Civilization of Light, to the new Humanity. Interpreting the planetary and cosmic rhythms, we are given the opportunity to align ourselves with the signs of Heaven if we trust, accept and listen to them.

So let us try to understand the language of Heaven as far as the astrological year 2018-2019 is concerned, under the Guideline:

"Artists of Thought – let's build in Beauty the Civilization of Light"

This motto affirms that mastering and utilising the thought in order to create "thought-forms", which are useful for the individual as well as for the human evolution is indeed a true art to be developed and nourished as a Service to Common Good.

The astrological year 2018 starts with Saturn and Mars joined at the peak (at the beginning of Capricornus) squared to the Sun in Aries. It is a relation of great tension, an invitation to use the Fire of the beginning of Aries (Sun) with responsibility and clarity at maximum to proceed on the initiatory Path (Saturn). This may require sacrificing personal desires (Mars) and adjustments according to the Saturnian call.

There are three moments, which particularly mark the next astrological year, in addition to the activation promoted by the fast proceeding planets (Sun, Mercury, Venus, Mars):

- The transit of Uranus from Aries to Taurus on 15.5.2018
- The trine of Jupiter in Scorpio with Neptune in Pisces on 25.5.2018 and on 19.8.2018
- The transit of Jupiter from Scorpio to Sagittarius on 9.11.2018

It is interesting to note that Uranus and Jupiter, the two planetary rulers of Aquarius, can be considered the guiding luminaries while approaching 2025 .

Uranus, responsible of the deepest transformations on the Planet, is the only luminary among all the other slower planets, which is transiting at the beginning of the Zodiac. All the others (from Jupiter to Pluto) are currently transiting in the last part of the Zodiac, in the signs of water and earth (Jupiter in Scorpio, Saturn and Pluto in Capricornus and Neptune in Pisces).

This is to indicate that Humanity has been living for seven years throughout Uranus, the revolutionary forerunner in Aries, the strong urgent invitation to be inspired by the cosmic seeds which contain the ideas to build with the intelligence of the heart the new Civilization, the 5th Kingdom, governed by the Laws and Principles of the New Era.

Before being able to realize this promising goal, the planets in the last signs are emphasizing the theme of purification and transformation, in order that a vibrational rise may take place on the Planet. There will be months / years in which it is necessary:

- to include into and transform in our life (individual, group, earthly) those unconscious parts which we must bring to Light so to make our Space more pure and bright (Jupiter in Scorpio);

- to take responsibility of giving birth to the Age of the "Gold of Spirit", i.e. to unmask materialistic attitudes which do not reflect the Laws of Right Relations (Saturn and Pluto in Capricornus) and work within this purpose with the aim of using it for the Common Good and thus become a mirror of the Highest Worlds.
- to intensify the Christ consciousness within us through a greater unification, inclusion, compassion and forgiveness (Neptune in Pisces).

The invitation is, therefore, to facilitate the coming of the New Era by letting dye a deeply rooted system of life, no longer in line with the expectations of the future, so that a more mature and conscious world may reborn, even if this implies to release certitudes considered so far indispensable. On the other hand, in the celestial puzzle, the irruption of innovative and revolutionary energies which are accompanying these impulses with a remarkable driving force, are increasingly working in order to hasten an awakening to the reality by that part of people who 'living an automatic life, does not become an active and participant part towards this extraordinary vibrational flowing. Heaven spurs to expand one's mind 'beyond', with an opening which includes visions and intuitions of a world in an ongoing and accelerated evolution.

During the last years, the evolutionary design for Humanity has been more and more outlined, emphasize by new and bright ideas 'precipitated', allowing to formulate hypotheses of structures to be developed more clearly in due time.

In this cosmic picture, it should be noted that simultaneously Heaven has been enriched by more subtle energies to be perceived, though with a greater inner impact. The aim is to sensitise and develop the highest noble feelings within the Heart of Men, by approaching with growing empathy that Energy that we synthesize with the name of 'Love'.

It is up to us to conceive and increase creatively, with a sense of service, in the spirit of Brotherhood, how to act effectively through Good Will for the Common Good of all Humanity.

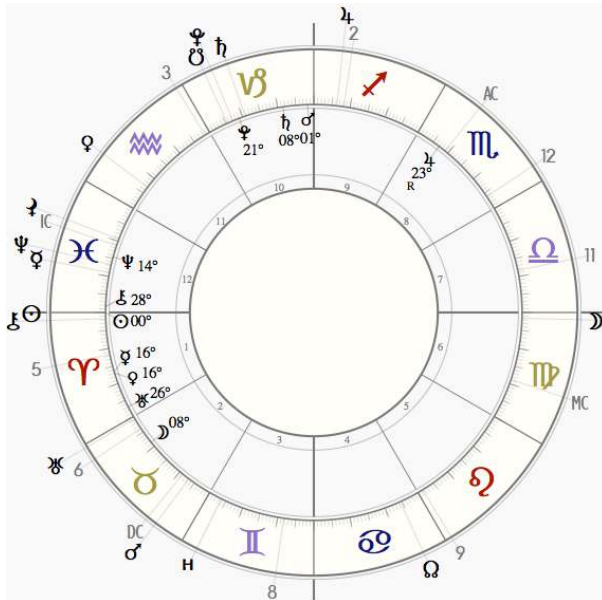

This year also sees the ongoing planning and sowing (Uranus in Aries) of what concerns the ultimate purpose of deconstruction and reconstruction of the future, even more compared to the previous years, we have a new important event !

This year, as a 'general rehearsal before the official performance' we will have the possibility to check whether or not the impulses so far received have been correctly perceived by our mind, 'testing' beforehand the instructions and verifying that same are properly manifested in the practical application of daily living.

Where we will find emptiness or uncertainty, as 'repetitive pupils', we will be offered the opportunity to review and correct our behaviours because from 2019 on everyone's task, at any level, will be to break the chains and with responsibility take root of the above instructions in an active and creative way.

Signs of Heaven

Astrological notes

Let us have look on our celestial stage to identify the signs of Heaven in the astrological year 2018-19.

Internal: Equinox 3/2018 – external Equinox 3/2019

- Uranus in Aries 26 ° , moves on May 16 to Taurus until 6 November 2018 and returns then in Aries until 6 March 2019

Uranus (7th Ray, Order - Ceremony), planet of the revolution, freedom, awakening, of the spark of new values, rules the hierarchical level of Aries (1st Ray Will - Power);

This planet has had the task to introduce fiery

ideas (thought-forms) and innovative and futuristic boosts which, in this pioneering sign, acts as a *trailblazer*, thus preparing humanity to move towards the Age of Aquarius, of which Uranus is the main planetary symbol.

The astrological event of the greatest importance in the current astrological year regards this planet that will after nearly 7 years in Aries make a temporary move into Taurus (the distributes 4th Ray energy of Harmony through Conflict), a sign where it will return in 2019 to continue its cycle until 2025/26.

Whilst in Aries Uranus brings impetus and new ideas in Taurus such new in-puts have to be brought into concrete expression and be introduced in the real life.

From the impellent fire of Aries, Uranus prepares the ground for his next move to Taurus in the earth element of stability, meeting there Vulcan (1st Ray), the sacred destroyer of the forms and builder of the vision of the light.

It should be noted that in the last three years the flowing relation with Saturn in the fire of Sagittarius has encouraged the openness to new horizons of Light feasible for Humanity.

- Pluto in Capricornus from 19 ° to 22 °

Pluto (1st Ray, Will-Power) the great renovator, for 10 years in Capricornus (1st Ray), will pass to the third decade of the sign (20 ° -30 ° in cooperation with Mercury, 4th Ray - Harmony through conflict) and will stay there until 2025 when it will be moving to Aquarius (and the 4th Ray will enter into manifestation). Pluto as a proponent of a new artistic cycle?

Pluto and Uranus, are the two transpersonal planets which in the seven formations of tension have enormously affected the course of events in the economic-financial, social and political field, with the aim of un hinge crystallization and obsolete models that had become obstacles to the affirmation of the new world. A 'dance' between these two pillars of our solar system that has counted the

dynamism of 7 squares aspects in the last years, facilitating to stir up consciousness and project them towards the great change, both internal and external.

From 2019 on they will be transiting in the signs of Earth, in harmonic relation to Saturn, and a large earth triangle will be formed, thus cooperating to go forward concretely towards the purpose of rooting the new: Values which reflect the Kingdom of Souls and allow to give birth to the Civilization of Light.

-Saturn in Capricornus from the 8° to 19°

Saturn (3rd Ray, Active Intelligence) exoteric and esoteric ruler of Capricornus, Lord of Karma, has moved at the end of last year from the fire of Sagittarius to the earth of Capricornus, where it will be remaining until 2020, together with Pluto.

We know that this is the sign of the peak of the realization of the Light and of the fulfilment of the Soul, as well as the domain within which all the existing structures must be subject to the ax which cuts and crumbles what is no longer authentic and necessary to human and planetary evolution, in the perspective of the construction of the new Civilization but, at the same time, will bring energies of light into the mental sphere as well as a greater responsibility, perseverance, organization, structuring.

- Neptune in Pisces from 14° to 16°

Neptune, (6th Ray, Ray Idealism - Devotion) transpersonal planet of the vision and of the psychic sensitivity, continues its motion in Pisces (2nd Ray Love-Wisdom), being its exoteric ruler. His position in the current astrological context is important as it brings a vibrational balance and provides feelings of acceptance, inspiration, empathy, compassion, unselfishness service.

- Jupiter in Scorpio from 21 ° retrograde to 13 ° in July, from 9 November passes into Sagittarius

Jupiter (2nd Ray, Love - Wisdom) planet of faith, expansion, wisdom is in Scorpio (4th Ray, Harmony through Conflict) since October 10th, 2017

The astrological year foresees a deep phase of purification, first 'with the water', to allow to bring Light to the dark waters of the unconscious to facilitate a re-orientation of the Soul, later, in Sagittarius, with awareness and truth thus acquired, continues its action of purification, but this time 'with the fire', this will project us directly into the world of the spirit!

Planetary aspects

- **The waterly trine between Jupiter in Scorpio and Neptune**, both exoteric rulers of Pisces, will develop the quality of Love-Wisdom in the Heart of Humanity and allow to focus an alignment into the salvific waters of 'Pisces' and be able to merge into the great All of the cosmic ocean. This perception enhances our creativity as well as our awareness that basically we all are One.

- **Jupiter from Scorpio will not form any planetary aspects with Uranus in Taurus**, but being the opposite signs, a dialectic can be created between them. In fact, the Taurus-Scorpio axis recalls the subject of our attachments which have to be broken, a shadow of the earth signs in particular, so that the fire of
- Uranus's Spirit may be welcomed by the fruitful earth of Taurus thus activating Venus (exoteric governor) in order to concretize the ideal of Beauty, Harmony and Balance within the Forms of the future.
