

## The human Group toward a planetary System and Order

We intend to sow some thoughts around the idea of a "System", one of the "working directions" related to the organic structure and the very name of *The Planetary System* (TPS), an online platform or "plan" set up by a group and workshop of thinkers in order to search for and share "Ideas, Formulas and Forms for a new Culture and Civilization".

On the TPS page dedicated to the articles on the concept of System, we read that a "system" is "a sturdy composition of elements".

First of all, we can think of the system of numbers... with Pythagoras describing: "Numbers are the principle and essence of all things."

The 'sturdy' nature that distinguishes a *systemic* disposition of the units of a set cannot be rigid, but rather stable, *integrated*, that is, organic, or interactive in a flexible way, in its internal and external relations; we could say that '**systemic**' is *the scientific method of Nature to harmoniously organize and order the units or parts of a whole, so that they are "in right relationship" between themselves and with the greater Whole.*

The Idea of Order is even more dynamic than that of System: Order comes in fact from the Indo-European root \*AR - / \*OR - / \*UR, which indicates *movement toward, motion to unite* and, in essence, UR means Light, Fire, current of energy.

A very important Formula in the esoteric Teaching combines the flowing energy with the activation of consciousness: when energy flows between the two poles of spirit and matter, there is *relationship* or consciousness. Applied to humanity, seeing it as a planetary human system, when any individual or human group connects their *self-consciousness* to planetary consciousness or *common Good*, they open a sliding channel for this higher *order* of energy, and its "motion to unite." Then the energetic power of this individual or human group becomes *systemic* or collective.

It is *as if* a plug had been inserted into the power point of the 'common planetary Home'. Such an "awareness", we may well suppose, has an intensity and depth very different from the so-called *self-consciousness*, ranging from the simple individual registration of a sensation, an emotion or an intellectual thought to the awareness of our very qualities and uniqueness.

In contrast, the collective awareness and planetary energetic current is global, systemic, inclusive and comprehensive, and penetrates ever more decisively in the world and *plane* of the intuition or "direct understanding", whose "voltage" is always useful and beneficial at a general level.

The individual *self-consciousness*, the basic principle of the human or fourth natural kingdom of the planet, but also the *self-consciousness* of the various human groups that arise around many different reasons - from the more biased to the most well-intentioned - can and will progressively *well orientate* themselves towards a *planetary Consciousness*, according to the evolutionary Direction and Necessity.

This evolutionary or ordered Advancement toward the *planetary Consciousness* brings all parts to *break free* and *to free* thanks to the golden service to the *lower* in imitation of the *higher*. We can

think of it providing three aspects, according to the three main Laws of the solar system, indicated by esoteric Tradition:

According to the Law of the maximum results with minimum effort or resources, or *Law of Economy*, the parts must organize themselves into a unified and unitary **System**, or a "sturdy composition of elements", as do the muscular or the nervous system of a human being, for example, or the system of the natural kingdoms of the planet, or the solar system, and so on:

According to the *Law of Attraction and Repulsion*, the Second and the main Law of this solar System, *Harmony* must be the resounding and progressive rule of "Group consciousness", or that binding energy or *Love* that goes beyond any friction or attachment or partial vision.

Any System of parts or Group that is truly such has a *Heart* that pulsates at the center, a motor of unity and order: Heart, the core and source of life, is that "sun of its system" which can go beyond each formation or partyism to serve the "common good" or its higher function "outside of itself", and yet preserved in the deepest nucleus of itself

This Sun of the common Heart of Humanity, latent or rather potential, and yet more and more necessary or urgent, nourishes, supports and focuses from the center:

The Fire or Ordered "method to unite", the propelling power of that energetic or dynamic reality which is the very structure of life, is the "Hierarchy of Space" and the Principle of overall Unity, also of us, the One-humanity.

*Hierarchical Order* etymologically means "custodians of the Sacred", of that vital energy, in the service of *infinite Unity*, which can fertilize substance to realize the synthesis of all the parts in a new *collective Individual*.

The sacred Order of Solar Space works, at its level, with the *Third Law of Synthesis*, which is no longer for overcoming conflicts and differences between parts and sides, but for the gradual and accelerated strengthening of a joint action by units or *monads* now able to "cooperate in a coordinated manner towards the common Purpose."

System, Group, Order are all wonderful Energies and Ideas to express the *synthetic Oneness* of all. Humanity can and must learn, ever increasingly, to become hierarchical, sacred, to govern as a *planetary Order*, to love as *one Group of Hearts* and to create a *System of harmonic or joyful relationships*.

In support of what is presented, here are now some extracts from "A Treatise on Cosmic Fire" by the Tibetan Master, a text of *esoteric Science* which is part of that Ancient Wisdom at the base of every tradition.

The term "Logos" is recurrent, which stands for that Entity or *divine collective Individual* which is leading our planet or, in the case of a solar, or cosmic, Logos, stands for that Life or Being that "informs" a solar or cosmic system their vehicles of manifestation:

14) (TCF p. 1212)

"It is a truism in occultism to say that nothing stands alone, yet it is a fact that each infinitesimal part of the whole has **three relations**:

1. To those units which form its body of manifestation.

2. To its own unitary life.
3. To that greater unit of which it forms a part.

One of the main things which, it has been said, underlies logoc purpose, is the working out of ways which will result in true **group unity**.

**All that is to be seen might be regarded as a gigantic endeavor on the part of a great Intelligence to produce a group. Evolution is to be regarded, therefore, as a vast experiment with this objective in view.**

This triple responsibility referred to prior exists for the atom or for the solar Logos, and the trend of the evolutionary process is to make each unit, microcosm and macrocosm,

- an intelligent co-operator,
- responsive to forces impinging upon it externally,
- and aware of its own internal economy and of the latent forces and energies with which should help to contribute to the good of the whole.

Man, standing as he does at the middle point in evolution, and marking the stage in the evolution of consciousness where a triple awareness is possible, that is;

- awareness of individuality,
  - awareness of the forces which are subhuman and which must be controlled,
  - and awareness of a place within the plan and purpose of a greater Man
- must, therefore, rightly be regarded as the most important of the evolutions, for through him can be worked out intelligently the laws of group unity for all the three groups: superhuman, human, and subhuman.

p. 1216) “... the immediate objective of the human kingdom is *consciously* to establish *systemic* relations, and be actively, and consciously, part of group work.”

In the texts of the Ancient Wisdom, the Model for any **Order, Group** or harmonic **System** between *centers of consciousness*, and therefore also for the human and planetary, is shown to be the **sevenfold canon**. This is the Number Seven, the possible permutations or correlations between a triad of fundamental principles or aspects of the One. These are the seven Principles of the One Life, the Seven Rays or Building Logoi, the seven Creative Hierarchies of solar Space, the seven cosmic planes of Substance.

*“The universe is a system of hearts”*. (Agni Yoga)

*“Life conquers Space through a system of seven centers.”* (E. Savoini)

Presentation on YouTube Channel:

This video intends to present and sow some thoughts around the idea of a "System", one of the "working directions" related to the organic structure and the very name of *The Planetary System* (TPS), an online platform or "plan" set up by a group and workshop of thinkers in order to search for and share "Ideas, Formulas and Forms for a new Culture and Civilization".

The concept of System, or "sturdy composition of elements", is applied to the whole human Group, which is destined to learn to "cooperate in a coordinated manner towards a Purpose", or the common Good, in imitation of the higher Models and Orders:

"... the immediate objective of the human kingdom is *consciously* to establish *systemic* relations, and be actively, and consciously, part of group work." (A. A. Bailey, A Treatise on Cosmic Fire, Lucis Collection, p. 1216)
