

1) Mars-Jupiter-Neptune Rhythm and Cycles

2) The rhythmic pulsations of the 2 Solar Plexuses of our Solar System rule and teach the elevation of energy from planetary and human plexuses to the planetary and human heart, from the astral to buddhic plane, from individual to group consciousness. Their cyclic celestial geometries reveal the Sound or causal Purpose of their Relationship.

3A) As we all know, the theme of the energy transfer from the solar plexus (6th R.) to the heart center (2nd Ray) is *central and crucial* for the current level of humanity, focused almost entirely on the level of the *desire-mind (Kama-manas)*: we think driven by desire and not yet by *love-wisdom*, the primary Goal for our and planetary evolution.

3B) Consistently or analogically, even our *non-sacred* planetary Logos is in fact focused on the cosmic astral plane (3C) and therefore still expressing Its 3rd Ray of Personality: He must learn to settle on the cosmic mental plane (3D), where the causal bodies of the sacred Luminaries and of the Solar Logos work; then He will be able to express Its Soul 2nd Ray.

Likewise, **the transfer from 6 to 2** is primary for the entire current Solar System being of the 2nd Ray and dedicated to the *evolution of consciousness*, the 2nd Aspect: no longer only of the 3rd Aspect of Matter / Substance (which was the transfer from 5 to 3 [3E], from sacral to the throat centers) as in the 1st Solar System, and not yet of the 1st Aspect of Life / Spirit (from 7 to 1 [3F], from the Base to the Head Centers).

In terms of esoteric *psycho-mathematics*, we can say that the passage from 6 to 2 involves the sacrifice of the 3, of the 3rd Aspect for the 2nd:

4)

6 : 3 = 2, or the *subtraction* of the form aspect: **6 - 4 = 2**.

If the Matter / Personality learns not to *resist* the evolutionary Motion, the *Divine Incentive*, that is, if it *sacrifices* itself to the evolutionary Necessity, it is *made sacred*, it is enlightened and the suffering of the *astral waters* and of the 3rd aspect disappears:

"(...) The same conditions which blend the Law of Sacrifice with pain and sorrow and difficulty are found also on the planet Mars and on the planet Saturn. They are not found on the other planets. (...) Saturn, Mars and our Earth constitute, in a curious esoteric manner, the personality of a stupendous ray Life, Whose energy is that of the third Ray. (...) The personality of this third ray Life functions through the following planets:

1. The mental body expresses itself through the medium of the planet Saturn.
2. The astral body expresses itself through the planet Mars.
3. The physical body expresses itself through the planet Earth." (EP II, 98-9)

According to this Third Aspect perspective, Saturn and Earth, Third Rays, are connected through Mars, the *non-sacred* Sixth Ray, which prepares the *fiery ground* to be crossed and dominated in order to synthesize the *sacred* union of the Third and Second Aspects.

5A) And it is only in the solar plexuses of the Disciples and Initiates, no longer ruled by Mars but by Neptune, the *sacred* Sixth Ray and II *Scheme of Synthesis*, He "who veils the Christ as initiator of humanity", that the **Law of Sacrifice** can become detached from suffering, pain and difficulty, **5B)** finally at the joyful Service of the *Sacralization of Substance* through the *Sacredness of Sensitivity*, of Consciousness.

*Sacrifice, the first aspect or power of divine Love, then makes the Form sacred, or - as Mme Blavatsky explains the term **sacr** - Spirit fecundates and sublimates Matter.*

In an astrological key, in recent years this *Divine Comedy* is **really** represented on the solar Scene which implies the *Tragedy* for the form side, the 3rd Aspect not yet transmuted.

6) In particular, this year we have:

- the exceptional presence of both **Neptune**, 6th Ray and God of the Waters, and of **Jupiter**, 2nd *divine* Ray and Master of Love and Wisdom, in Their *saving* Sign Pisces (it has not happened since 1856), and Pisces transmits precisely these two equal Rays, between plexus and heart: between the Fish linked to Matter and the one turned to the Spirit. Here these two Rulers represent the infinite expansion and sensitivity of the spatial Substance (Jupiter) and the return to Being, to the "House of the Father", to Communion with the World of Ideas (Neptune).

7A) Mars, at the moment of the last December solstice, the initiatory and synthetic moment of the entire planetary Breath 2022, geocentrically went forth charged with the energies of His hierarchical Sign Sagittarius (while heliocentrically with those of His esoteric and exoteric Sign Scorpio), to ignite gradually all the 'deep' Luminaries:

7B) flanked by **Venus** It joined **Pluto**, very powerful and disruptive in Capricorn, on **3 March 2022** geocentrically and on **19 April** heliocentrically, as happened two years ago when even Jupiter and Saturn passed through Capricorn, at the time (February-March 2020) of the spread in Europe of the pandemic: therefore, the destructive power but also the reforming power of all obsolete structures, forms of relationship and old conventions, in the political, economic and organizational fields (1st - 3rd and 7th Rays of Capricorn) are *stirred up*.

8) Then, in the course of March, **Mars** together with the *Solar Angel Venus* from **Aquarius square Uranus** in **Taurus** (while at a heliocentric or causal level it happens in May), **has** reactivated the difficult *crucifying* right angle of the Saturn-Uranus quadrature active in 2021-22, *the Luminaries of Battle*, which shakes every need for security and stability (Taurus) in the Name of the advancing New (Aquarius). However, the square also greatly stimulates the search for a new harmony between the planetary Ajna center ruled by Taurus, the *new Group of world servers*, and the planetary Heart Center ruled by Aquarius, the *Hierarchy*.

In particular, **Mars and Saturn meet on April 5th** (heliocentric **next** on **May 25th**): this conflictual conjunction in Aquarius, in the month of Aries, speaks to us of a great renewal push which, at best, from the *Human Group Soul* or heliocentric point of view, inspires a shared desire for reforms and new forms and solutions for the Science of Service.

9) - **Jupiter** and **Neptune**, meanwhile, tighten more and more to culminate in their very powerful *saving* conjunction on **April 12** (while heliocentrically it will be **June 6, 2022**) in the receptive and liberating waters of Pisces.

Here are their geocentric conjunctions of these decades: [pics]

Their last conjunctions were therefore in Aquarius in 2009 or earlier in Capricornus in 1996, the next ones will be in 2035 in Aries and in 2047 in Taurus.

Among all the Signs, Their most powerful conjunction is however that in Pisces, and concerns the *saving* force that destroys "all" the obstacles (regency of Pluto) that stand in the way of the *liberation of the human Soul and of Humanity* (ruled by Pisces), by the work of Love-Wisdom and its 'agents of transmission', the *Lords of Compassion* such as we, the *Fourth Creative Hierarchy*, are in essence.

10) *Purified desire and sensitivity* (Neptune replacing Mars) *save* in the name of *Love-Wisdom* (Jupiter):

“Love is fallen and blinded when desire is rampant; desire vanishes when love triumphs.” (EA 171)

The *expansion of Consciousness* (Jupiter) corresponds to the increase in the *sensitivity of Substance* to the impressions and Will of Life (Neptune-Vulcan).

11) A 'moment of breath' will be **at the end of April** when **Venus**, the solar Angel, reaches geocentrically the two Great Mothers **Jupiter and Neptune** at the edge of the Sign of the *Father* and of the *Son Savior* Pisces,

11A) in beautiful sextiles to Pluto in Capricorn and to Mercury in Taurus

11B) (from 25 to 27 April there **was** a *stellium* with also Mars and Moon transiting in Pisces): it **has been** a propitious time for humanity, the planetary Throat Center ruled by Pisces, to lessen its *resistance* to the evolutionary Necessity and to make the *saving force* of the Great Triangle Shamballa-Hierarchy-Humanity circulate.

12) The solar Heart **Jupiter has just entered Aries on 11 May** (heliocentrically it will be on **17 August**) and **Mars joins its superior Neptune in Pisces on 18 May**, immediately after the peak of Wesak (16 May 4.14am UT): the two solar plexuses unite and merge and a new dose of *compassion* floods the *glamoured* astral body of humanity.

- **Mars enters His Sign Aries on May 25** and joins the Heart **Jupiter at 3° Aries on May 29**. This either precipitates uncontrolled impetuosity or the kama-manas advances driven by the Love of the enlightened Mind; either prevaricating presumption or desire and revelation of *new forms* of Wisdom.

13) If the view is correct, **June** will be a propitious time for a ‘triumph’ of *right human relations*, in the Name of the Christic Principle *Buddhi*: mainly, as mentioned, the **heliocentric conjunction of Jupiter and Neptune on June 6**,

14A) marvelously reached by **Venus on the 11th June**, when the apparent Sun passes between the stars of the cosmic Christ Orion and the full moon of Gemini is prepared on Earth (June 14 h 13.52 - 11.52 am UT), consecrated to the One Humanity and to right human relations.

Spiritual Love is the Winner, and awakened hearts will have to be ready to assist this inundation of *Christic Magnetism*:

14B) *Christ in us, certainty of Glory!*

Desire moved by Love is our certain Hope of victory, it is the propulsive energy of the return to Good, that Fire of Devotion and abstract Idealism that builds and realizes it, in due time according to the Spatial Art of Cycles.

15) To remember, the **2-6 Rhythm-Cycle Jupiter-Neptune** is the higher octave of that between **Jupiter and Uranus**, the Polarity 2-7 of the *beneficial fulfillment*, being the periods of revolution of Uranus and Neptune in this double harmonic ratio (Uranus 84 earth years, Neptune about 164-8).

We can infer that, between April and June 2022, *the united Breath and unified Rhythm* of Jupiter and Neptune (rulers of Pisces) circulate the fulfillment of Good in the solar Space (ensured by Jupiter and Uranus, rulers of Aquarius).

While Uranus and Jupiter join every 14 years, building a 6-pointed Star in the Sky every 84 years,

16A) Neptune and Jupiter join every about 13 years, each time in the next sign, making a full circle of 12-13 conjunctions in about 166 years, in a *year* of Neptune.

Their united Breath and unified Rhythm therefore magnetizes and connects the

16B) 12 successive *petals* or degrees of the *open spiral of the solar Heart*, the **Zodiac**, the *Horizon* and the *Wheel* that moves, for Love, the Evolution of Consciousness on the *common plane* of the Ecliptic.

17) In this all-important conjunction of 2022, Their 2nd and 6th Ray energies, combined with those of Pluto's 1st *Liberating Ray* (in collaborative *sextile* from Capricorn), all three *transmitting agents* or *rulers* of Pisces, engage in the depths of consciousness that burning germ or desire for the *salvific force* which, in due course, will make Humanity emerge from identifications with the material aspect of becoming, to reveal the Essence, the *Unity of the Whole* and the reality of Man as *cosmic Love incarnate* (*Buddhi* or *sixth Christ principle*).

*

18) Continuing with the motions of the Solar Plan in 2022, at the heliocentric level **Mars in Pisces will reach the Superior Plexus Neptune on July 18** and the **Heart Jupiter on July 25** to finally enter Aries on July 28. Since we can ascribe the heliocentric level to the highest and systemic causal Impulses, it is here that the solar Warrior "who transforms the Will of Vulcan into action", purified by the encounter with the Love and Compassion of the Father, *advances as the Angel defender of the Good, the Beautiful and the True and, from the plane of Ideas, rules.*

19) Geocentrically, at the beginning of August 2022, **Mars** will reach **Uranus** (helio on October 14) and the **lunar node** at 18°-19° Taurus, Uranus again in a large square to Saturn in Aquarius: *lightnings and flashes in the vision.*

The vision of the New has as its price the sacralization of the past and the abandonment of the veils of unreality: the true power to *make all things new* is Sacrifice, the *sacrum facere*, *the power of Love*, which is the Law of Necessity.

Such then is the march of our Elder Brothers in this crucial time.

20) Let us now see a little more expanded the cycle of the two plexuses **Mars and Neptune** to monitor their *fusion* in service of the Heart of the Sun and the **Divine Second Ray**.

It is noted how the Two meet on average every 23 months, 7 times in each Sign. This figure refers to their *heliocentric* encounters, therefore univocal without retrogradations. From the conjunction of **28 October 1860** at 28° 11' Pisces to that of **10 June 2024**, 164 years pass, a cycle of Neptune, with approximatively **84** conjunctions with Mars: and **84 is 7x12**, it is the sacred number that unites Life and Space, the 7 Rays of *Life* to the 12 petals of the Zodiac and the Heart of *Space*. 84 is the Number of the relationship between the Hierophant to the Mysteries Uranus and the neophyte Earth-Gaea.

The next heliocentric conjunction **Mars-Neptune on 18 July 2022**, **we can assert to be** consecrated to the *solarization of the plexus*, to the dissolution of kama-manas, of the egotistic aspects of desire, will be precisely the 6th **one** in Pisces (at 23° 39'), and in the 6th sector of Pisces if we divide the Sign according to the septenary Rule: important accentuations of 6, that Number and Ray of "perfection in form", the hexagon that contains the *6 pointed and 7 centers Star of the hierarchical Order*.

21) This union between the Sixth Rays will take place precisely in conjunction with **Jupiter**, which is not frequent (at 27° Pisces). In particular, we note that the Earth will then be close to Pluto (i.e., the Sun will be opposite to Pluto between Cancer and Capricorn); **July 2022**: a great moment of purification and ascension of desire and of deepening of the *supermundane sensitivity*!

22) The *rhythmic pulsations* of the 2 Solar Plexuses of our Solar System about every 2 years, which simultaneously see Jupiter tracing in the Zodiac the sides of a **hexagon**, the *perfect Form*, therefore govern and teach the elevation of energy from the plexus to the heart, at a solar, planetary and human level, from the astral plane to the buddhic plane, from individual to group consciousness.

23) Their **Rhythm of 7x12 conjunctions (7 full revolutions of Jupiter!)** reveals the Sound and the causal Purpose of their Relationship: in each Sign they emit a *Star of Life with seven impulses to unify the upper triangle of the Heart/Soul and the lower one of the plexus/Personality.*

While Jupiter builds and teaches the *beneficial accomplishment* through the *fusion of heart and mind*, from Mars to Neptune the basic *sensitivity* of consciousness rises from astral to buddhic, from human to christic; conversely, from Neptune to Mars, conflictual and separative action becomes heroic, inspired by the spiritual Vision and universal Compassion.

*

24) The other compound cycle involved, between **Mars and Jupiter**, shows that They join every 26-27 months. According to the univocal heliocentric Dates of Their encounters, from the **16 May 2020** conjunction at 17° 23' Capricorn (where Saturn and Pluto also dominated! - see worldwide pandemic) to that of **19 February 2056** at 23° 08' Capricornus, 36 years and 16 conjunctions pass, when they "close the circle" by drawing a **16-pointed Star**, a *16-petals throat center* drawn, however, in 3 pentacles, or successive unifications in a *constructive* quintile relationship: every time Jupiter meets Mars, He *re-proportions* by teaching Him lessons of *wise collaboration* rather than of *egotistic competition*.

*

25A) Returning to the Triad 6-2 Mars-Neptune-Jupiter, we have been seen that the solar Plexuses and Heart can be found in Pisces every cycle of Neptune, which is about 164 years (approximately every 14 or 2x7 cycles of Jupiter), but in the preceding or subsequent times, if it happens, often they are not in **triple conjunction**: so it was in 1856, 1689 or 1358, and it will be in 2188. To have all three of them joined in Pisces like today in **2022** it is necessary to go to **1524**, in full Renaissance, or to **2342**.

25B) *It is therefore a very propitious time today to raise the human energies from the astral to the buddhic plane, from the plexus to the heart, from desire to Love, and thus to return to the Father's House to save and revive the prisoners of the Planet.*

26A) Today, 2022, is the time of a **Christic Renaissance**, in view of the hierarchical peak of **2025** which will see **the conjunction between Saturn and Neptune at the initiatory beginning of Aries** (here heliocentrically in relation

26B) to all 3 of Its rulers Mars, Mercury and Uranus): will the drosses be burned to plan finally a new solar Civilization moved by the will-to-good and based on goodwill?

From **2025** onwards, humanity might experience a higher release (from inner kama-manasic war) as a consequence of group consciousness reformation (caused by **Pluto in Aquarius** – from 2024 to 2042), with a global planning for the Start of a new solar Culture (Saturn-Neptune in Aries).

26C) Uranus, solar mental permanent atom and the *Sirian Head* of our solar fleet, in 2025 conjunct Alcyone in the Pleiades, the hub of our local universe, holds and will hold the right Direction.

Finally, it can also be thought that this triple Mars-Neptune-Jupiter conjunction prepares the field for the arrival of

27) **Pluto in Pisces** (from 2042 to 2068), esoteric and hierarchical ruler of the Sign, to complete the current phase of *Regeneration* of humanity, "before the sun rises": that is, before the central peak of the 500 years in progress between the two eras, indicated in 2117.

Glory to the great solar Saviors!

*

28) As a necessary appendix, this Solar Divine Comedy between plexuses and Heart is briefly inserted in the major schedule set up by the deeper Luminaries Uranus, Neptune and Pluto:

29A) We note that since 900 AD to 5340 AD (from Pisces to Capricorn Ages) the Unions between these *most profound* Lords, Neptune and Pluto (*vicar non sacred* of Vulcan 1st Ray *sacred*), happen in **Gemini**, the *Head of the Cosmic Christ* (Sirius) and pure 2nd Ray Sign, whose creative Hierarchy is the Agent of Transmission of the *Desire for Duality* from the 6th sub plane of the 6th astral cosmic plane (6.6). In a synthetic Formula, these 4,500 years are under the banner of the

29B) *Will (Pluto) to dissolve (Neptune) everything in Love (Gemini).*

Two ages pass in 4500 years, therefore the ecliptic sector of 30° *qualified* in this precessional Cycle by the Gemini Sign/Archetype intercepts different sidereal constellations (those of the Bull and Ram).

Furthermore, it is noted that the successive conjunctions in a particular Sign between Neptune and Pluto do not have a "regular" angular interval, so there are only 2 or 3 in Pisces and Aquarius for example and 9 in the current Gemini for precisely 4-5,000 years (this is plausibly related to the eccentricity of Pluto's orbit).

30) Thus, also the Cycle between Pluto and Uranus, whose subsequent conjunctions (last in 1966 in Virgo) show an even more pronounced irregularity as well as a polarized trend.

(Let's contemplate all these cyclic vibrations or celestial embroideries through the eye of the Heart, like the very causal score of the systemic, planetary and human destinies)

31A) So, the last icing on this *celestial cake* is that, with respect to the progressive primary Dates of the conjunctions every half millennium between Neptune and Pluto, **Uranus** successively touches all 12 Signs (clockwise in 6000 years), wonderful! ...*The Cosmic Zodiac of Uranus, 7th Ray and I Scheme of the Synthesis.*

In synthesis, the Will of the solar Logos initiates and moves the Waters of the solar System through Its *kundalini* energy or vital Power, according to the very deep impulses of the Neptune-Pluto cycle, while Uranus ensures its rhythmic and orderly circulation in the Wheel of Evolution.

31B) While Neptune and Pluto *stand*,
Uranus *circulates* in the Twelve,
attesting in the solar Space
the Hierarchy of the cosmic Christ Sirius.

32) To close in Beauty, let's celebrate together the next Alignment of Uranus in the very centre of Taurus (heliocentrically on **May 23rd**, while geocentrically it has just been **May 9, 2022**, and it will

be again on **January 10 and February 5**, next year **2023**). Uranus is the Initiator to the Mysteries, Lord of the Order and “He who makes all things new” and this *crucial Direction* (along the 3 main full moons dedicated to the 3 planetary Centres Shamballa, Hierarchy and Humanity) can be envisaged like a Rod of cosmic Light&Harmony, so necessary now!

Taurus-Scorpio is the *zodiacal equator*: pure 4th Ray, the Ray of the 4th Human Hierarchy; Taurus is the *Eye of Revelation*, and rules the New Group of world servers, the planetary Ajna Center.

Thus, this is a *Festival of Cosmic Light* for us, for the New Group of World Servers.

May we carve the golden way
From chaos to Beauty!

(You can check the related article on TPS website on May 23)

So, *to close in beauty*, here is a Taurus video-poem, one of the 12 dedicated to the 12 Signs, to Their causal Ideas, Sounds and Lights. Enjoy!

*

Raising our loving eyes to Heaven, we therefore assert:

Hail You Brothers
– and our ego dissolves.

*
