## The Solar Scores

Based on what has been presented in the document [Luminaries-Rulers-Planets for the astrosophic vision](#), we present here a *systemic* hypothesis of their relevance and meaning in the 12 Signs of the Zodiac.

In fact, the arrangement in a 12×12 Lambdoma allows for a synoptic and integrated vision of the various *relationships* between the Planets of Esoteric Astrology, bodies of expression of the solar Centres or *planetary Logoi*, with respect to the 12 Fields of the evolution of consciousness, the 12 zodiacal Archetypes<sup>1</sup>: 144 *qualitative values* or sound nuances which are important to order and include in a *harmonic system* of relationships and correspondences, so that we can achieve an increasingly *synthetic* understanding of the *causal* energies and forces of this “highest among the Sciences”.

In the aforementioned text, an attempt has already been made to identify the values according to the three levels of the Rulership of the Signs (*hierarchical, esoteric* and *exoteric*) indicated by the Esoteric Astrology (see p. 68), *from virtues to vices*, i.e. defining both the higher and ‘lower’ or undeveloped aspects at the exoteric level of *ordinary* humanity.

Our inquisitive gaze now leads us to enquire further in order to grasp the *sound* of the Planets *in relation to all 12 Signs*, inscribed *in good time* by exalted and excellent Composers in the **Scores** of the [solar Orchestra](#), but *activated* in a particular way by their cyclic transit through such qualified fields of Evolution.

As our consciousness is in perpetual evolutionary motion, the reading of the various combinations is an eternal “work in progress”, so we will constantly update these harmonic diagrams, according to the growing light of our understanding.

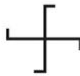

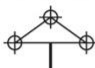

We present here the *synthetic Formulas* of the *exoteric* perspective and, in the following Lambdoma, those of the *esoteric* level:<sup>2</sup>

- In the first Lambdoma, relating to ordinary humanity, ranging from the instinctive level to that of ‘good will’ and ‘common sense’, for each ‘box’ or position the positive or virtuous significance of the Luminary's relationship with the *exoteric ruler of the Sign* (e.g. Jupiter in Aries: Jupiter-Mars) will be indicated first, followed by the involuted value, that we express when we are still imprisoned by the limits of our responsiveness to evolutionary celestial influences;
- In the second Lambdoma, which is reserved for the advanced level of disciples and initiates, clearly only the evolutionary value is identified, the energy that the Soul or “group solar consciousness” has at its disposal, resulting from the harmonious relationship between the Luminary and the *esoteric ruler of the Sign* (e.g. Jupiter in Aries: Jupiter-Mercury);
- In a future third Lambdoma, the one for initiates of a higher order (beyond the third initiation), we will attempt to imagine the relationship between the Luminary and the *hierarchical ruler of the Sign* (e.g. Jupiter in Aries: Jupiter-Uranus).

Here are the three levels of the rulership of the Planets in the *12 branches of the 3 Crosses* (for their Ray Principles, meanings and values, please always refer to the various articles about Luminaries and Signs on TPS):

An important note: Esoteric Astrology is *geocentric* from the outset (Earth at the Centre of the zodiacal horizon), and yet, at the esoteric and hierarchical levels, it presents our Earth as a ruler (of the Gemini-Sagittarius axis), and therefore its value can be interpreted with respect to the 12 Houses/Signs, as clearly evidenced by the *heliocentric* perspective (Sun at the Centre of the zodiacal horizon), where our Planet is also astronomically one of the solar Centres orbiting around the Sun/Vulcan (see [Introduction to Astrosophy](#)).

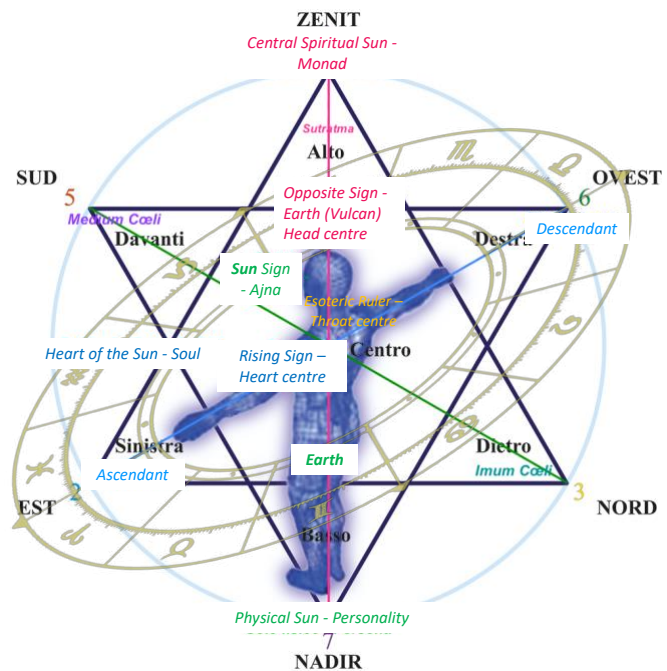

As regards the interpretation of the values of the *Earth in the 12 Signs*, it will therefore be necessary, from the exoteric perspective, either to leave the fields silent, undefined, or here we opted to qualify the values as 12 Ideas of the 12 Zodiacal Archetypes, synthesised by the *Earth at the centre* as the 'Place of Experience' of human evolution.

\*

The Earth in a celestial chart may also *veil* another function: on the Path of evolution, starting from the 3<sup>rd</sup> initiation (when a first contact between Personality/Matter, Soul/Consciousness and Monad/Spirit is re-established), the Initiate no longer has the Personality/**Earth at the centre of his system**, and this then assumes the significance of the *Sign opposite to that of the apparent Sun*, vehicles respectively of the personal/individual and monadic spheres, mediated by the *Soul Direction of the Ascendant*.<sup>3</sup>

The *Sun Sign*, one of **12** for each incarnation, merges with the *opposite Earth Sign*, and the Personality reaches perfection generating a *divine Individuality*, at the centre of the *6-pointed Star* composed of the energies of the **6** Zodiacal Axes. This *Star of Life* will eventually lead to the *central Triad* of the

Zodiacal Wheel of the *Solar Space*, that is, to the responsiveness to the **3** "intimate constellations" (Great Bear, Sirius and Pleiades), corresponding in the microcosm to the *spiritual Triad* vehicle of the *Monad*, and the passage of the initiatory Consciousness from the geocentric system to the heliocentric one.

Even *Vulcan in the 12 Signs*, indeed not ‘resonating’ for the ordinary consciousness, is associated in the exoteric perspective with 12 *operative and resolving Wills* of the Disciple, individual or collective, acting in the 3 worlds (see Its *12 essential Wills* in the esoteric Lambdoma), resulting from the combination with the 12 exoteric rulers.

Here, then, is the current draft, constantly being updated, of the *solar Scores* of the 12 Luminaries-Rulers in the 12 Signs; presently just for the exoteric and esoteric perspective (in blue when in their Rulership Sign):

Identifying with ever-increasing accuracy the nuances and levels of the great Game of causal energies is the task of the *Astrosopher* or Occult Astrologer, in the service to the sublime *Science of Spatial Relations*.

*Exactness is the Law of Heaven,  
and the understanding and imitation of Heaven is one of the keys to the Mysteries of Perfection.*

<sup>1</sup> "... the accuracy of astrological prediction and interpretation will be based upon three factors:

The potency of the thoughtforms which have been built up in connection with the twelve signs. These thoughtforms were originally constructed or anchored upon the mental plane by the Hierarchy in Atlantean days and they have steadily gained in power ever since. They serve as focal points for certain forces and enable the individual, for instance, to be in touch with great reservoirs of energy which then definitely condition him... (A. A. Bailey, *Esoteric Astrology*, p. 69)

<sup>2</sup> "- Ordinary humanity is ruled by the exoteric planets; advanced humanity, disciples and initiates by the esoteric planets.

- The Sun sign—with the exoteric planetary rulers—rules the personality, indicates inheritance and equipment and is a summation of that which has been, thus providing the background.

- The rising sign, with the esoteric planetary rulers, indicates soul purpose and points the way to the future, offering opportunity.

- The horoscope, built around the Sun sign, is adequate for ordinary humanity. The exoteric planets rule and the man lives within the limitations of the twelve houses.

- The horoscope built up around the rising sign, with the esoteric planets ruling, will convey the destiny of the disciple. As I told you, the disciple will later be responding to the influences of the twelve arms of the three Crosses as they pour their influences through the esoteric planetary rulers via the twelve houses.

- The Sun sign, governed by the ruling *esoteric* planets and the rising sign governed also by the esoteric planets, can both be used in casting the horoscope of the initiate; when superimposed upon each other, the outer life of the initiate in the three worlds and the inner life of subjective realisation will appear. This mode of super-imposition will be a feature of the new astrology.

- When the Sun sign, with the *exoteric* rulers, is worked out in a chart, the rising sign with the *esoteric* rulers is also worked out and the two are superimposed upon each other, the problem of the disciple in any one incarnation will appear."

(Alice A. Bailey, "Esoteric Astrology", pp. 513-4)

<sup>3</sup> "There are, as you know, two signs that are of significant, operative effect in the life of any individual: the Sun Sign and the Rising Sign. The Sun Sign is the sign of the constellation (I would have you note that phrasing) in which the disciple happens to be born; the Rising Sign is the sign of the constellation the energy of which must be used to fulfill Soul purpose in any particular life cycle or incarnation.

The Sun Sign conditions the personality; the Rising Sign must condition the inner person and eventually dominate the Sun Sign. ... There must, therefore, be established a relation between the Sun Sign and the Rising Sign.

... the disciple focuses in himself the Sun Sign and this conditions his personality; he seeks to realize the potency of the Rising Sign and this produces the ensuing conflict in his life; he also aspires to fulfillment in the polar opposite of his Sun Sign (which indicates personality perfection) and thus seeks to demonstrate the fusion of three forces, potencies or energies.

... The two energies [Sun and Ascendant Signs] have to be blended in order to set up an adequate magnetic pull so that response may be forthcoming from the opposite.

... the personality "standing in the Sun" sees the reality "rising over the horizon." Then, facing the imminent possibilities, the Soul invokes the polar opposite (Spirit or Monad, symbolized by the "Sign of Completion") and, in the tension of the point of crisis precipitated, evokes the will that unifies the three. ... This produces a focus of energies of enormous potency in the active expression of the disciple's Hierarchical service.

... After due process of thought upon the qualities and effects of the three signs and the nature of the esoteric planet, and having achieved the needed alignment, orientation and focused attention, the disciple then ceases to reflect and think and becomes a dynamic point of activity. He then proceeds with the work." (From *Zodiacal Meditations*—Tibetan Master, unpublished text, *School for Esoteric Studies*).
